

GKC's Team Beuk Clinics a HUGE success

Greater Kingston Area curlers enjoyed a great day with members of Team Beuk on November 16th.

There was a sold out crowd of engaged adults learning on and off the ice in the morning.

There was an enthusiastic group of youth curlers at the afternoon clinic.

Both groups were impressed by the “Smart Broom” Technology . Each member club has been provided with one of these brooms by Greater Kingston Curling for assisting in coaching and teaching.

The evening was spent teaching the area coaches and instructors how to use technology for improving and inspiring curlers. The use of lasers in curling drills was demonstrated.

How to use the Smart Broom to demonstrate the impact of proper body position to maximize weight transfer to the head of the broom.

A discussion on how to combine lasers for line of delivery, use of timing devices to develop weight control, sweeping skills, and team communication within a single practice drill brought it all together. Now our coaches and instructors get to take back this knowledge and put it into practice at the 4 Greater Kingston Area Curling Clubs.

Thank you TEAM BEUK!
